

MATH

Personalized, online math program that grows with your child

ALEKS (Grades 3–12) is a flexible, adaptive math program that meets students right where they are. It's especially helpful for identifying and filling in learning gaps, allowing students to move forward with confidence. Whether your child needs to review foundational skills or is ready to accelerate, ALEKS adjusts to their pace and provides a clear path forward.

It's straightforward and focused—no distractions or fluff—just solid math instruction tailored to your student. Our curriculum coordinators are familiar with the program, and next year we'll have a dedicated Online Accounts Curriculum Coordinator to provide even more support for families using ALEKS.

Quick Highlights:

- Adaptive, mastery-based learning
- Tracks progress and fills in learning gaps
- Self-paced with automatic assessments
- Great prep for middle school, high school, and college readiness
- Dedicated Online Accounts Curriculum
- Coordinator starting next year to help families

BCA Guides for Aleks Math

BCA's curriculum coordinators have created custom guides to support families using this program.
